## Work Party

A work party was called on Sunday Morning [7<sup>th</sup>] and a lot of good work was carried out by some of the usual suspects - some of who can be seen here. Allegedly resting after their labors but only at a distance.

During the Work Party there was much discussion about how we could put to good use the large quantities of chain that have accumulated around the compound. It may be that if Tom and Ron put their minds to it they could come up with an *IBC Coo* - to be modelled on this one spotted at Findhorn.
